Preface

Hillsborough County, located on the Central-West Coast of Florida, covers over 1,000 square miles. By population, it is the 35th largest county in the United States with 998,948 residents as of the April 2000 Census. The County contains three incorporated cities: Plant City, Temple Terrace and Tampa. Land area not in an incorporated city is under the sole jurisdiction of the County government. This analysis and report was commissioned by the Economic Development Department of the Hillsborough County government and performed by the Center for Economic Development Research, College of Business Administration, University of South Florida. The purpose of this report is to present business and employment data for Hillsborough County by 5-digit Postal Office zip code and to estimate the distribution of business and employment data by sub-county political jurisdiction. The Center for Economic Development Research provides information and conducts research on issues related to economic growth and development in the Nation, in the state of Florida, and particularly in the central Florida region. The Center serves the faculty, staff and students of the College of Business Administration, the University, and individuals and organizations in the University's service area. Activities of the Center for Economic Development Research are designed to further the objectives of the University and specifically the objectives of the College of Business Administration.

Introduction

The Center for Economic Development Research performed this analysis of the business and employment distribution patterns within Hillsborough County for the Economic Development Department of Hillsborough County. The Economic Development Department requested this analysis in order to provide data to support policy development and analysis in a number of areas. Business and employment data provide substantial information on commuting patterns and land use patterns. This information is important for transportation planning, land use decisions, tax planning and resource allocation.

This analysis summarizes and reports data contained in the attached Table B1 and in 24 individual maps. The data in Table B1 was extracted from the ZIP Code Business Patterns 1999 CD-ROM for the state of Florida. The data in Table B1 was tabulated and mapped by zip code for all of Hillsborough County; however, not all zip codes in Table B1 are represented on the maps. (See section on Zip Code Definitions.)

Data Sources and Methodology

Zip Code Business Pattern Data

The 1999 Zip Code Business Patterns, published in November 2001 by the Economics and Statistics Administration of the U.S. Department of Commerce, was used in this analysis. The data cover all private business establishments with one or more paid employees. Data are not included for self-employed persons, domestic service workers, railroad employees, agriculture production workers and most government employees. For example, the data for zip code 33620, which includes the University of South Florida's Tampa Campus, does not reflect the large number of employees at USF, because these employees are government employees.

The data on business establishments and total employment is categorized by zip code and 2-digit North American Industry Classification (NAICS) code. A brief description of the NAICS system is included in Appendix A. Business establishments are defined as: "a single physical location at which business is conducted or services or industrial operations are performed." Thus, a single business establishment could be only one of several branches of a corporation and is not a measure of the number of companies in a geographic area.

Total employment is measured as of the pay period which includes March 12, 1999 and covers all full- and part-time employees, and salaried officers and executives of corporations. Employees on paid leave are also included in the count. Proprietors and partners of unincorporated businesses are not included.

Zip Code Definition

The zip code locations and boundaries were identified using ESRI's ArcView Geographic Information System, a desktop mapping software program. These zip codes were released on the 1999 data and maps CD under license to ESRI from Geographic Data Technology, Inc. and are based primarily on 1998 U.S. Postal Service data. As zip codes and boundaries change from time to time, it is important to keep in mind that these are 1998 zip codes. However, since the business and employment data are from 1999, a high amount of geographic consistency is expected throughout the data.

As noted in Table B1 by the symbol ♫, some zip codes in ESRI's database are point zip codes. These zip codes are generally zip codes exclusively containing Post Office Box addresses. Because of their small size relative to the map, the point zip codes and associated data are not shown on the map.

Methodology

There are several zip codes in Hillsborough County which cross political jurisdiction boundaries. For example, some zip codes contain addresses in three different jurisdictions: unincorporated Hillsborough County, the City of Tampa and the City of Temple Terrace. Since the business pattern data is released by zip code, it was necessary to estimate the number of business establishments and employment in each political jurisdiction within the County.

The first step in estimation was to calculate the percentage of land area in each political jurisdiction relative to a zip code. Land area was calculated using the measurement tools in the ArcView GIS software. This percentage was then applied to the data for that zip code. The result is an estimate of the number of businesses and employment contained in each political jurisdiction's portion of each zip code.

This technique necessarily assumes that businesses and employment are uniformly distributed throughout each zip code area. While this assumption is unrealistic, there is no systematic bias in using this technique, which is expected to randomly result in underestimation in some places and overestimation in others. Additionally, given the number of establishments and employment in the County and number of estimates calculated, it is likely that the net effect is negligible.

Land allocation percentages calculated using the above methodology are indicated in Table B1 under the affected zip code. The resulting allocation of data is shown in the subsequent rows.

The identical technique was used to allocate data for zip codes which contain land area outside of Hillsborough County (33549, 33556, 33834, and 34221). The land allocation percentages are not shown in the table, but these zip codes are noted with an “ \ddagger ” in the “notes” column to indicate the data was adjusted. The zip codes’ data were reduced by 27.71%, 16.46%, 81.66%, and 91.51%, respectively, and it is the reduced figures that are shown in Table B1.

Analysis

We estimate that there are 26,494 private businesses in Hillsborough County, including all incorporated political subdivisions and employing 497,415 persons. Of these totals, an estimated 14,116 establishments and 236,298 employees are in the unincorporated portion of Hillsborough County. (See Table B1 below.) By these estimates, the unincorporated portion of Hillsborough County contains 53.3% of all business establishments and 47.5% of all employment.

The City of Tampa contains an estimated 11,476 business establishments and 245,112 employees. The City of Tampa contains a smaller proportion of the County's business establishments than the unincorporated County (43.3% to 53.3%), but a larger proportion of the employment (49.3% to 47.5%). This reflects the higher structural density for commercial office space in locations within the City of Tampa in places such as the Central Business District and much of Westshore.

Business Establishments

Nine zip codes in Hillsborough County contain over 1,000 business establishments. Of these, two zip codes are exclusively in unincorporated Hillsborough County (33511 and 33618) and two are in the City of Tampa (33609 and 33602). The largest number of businesses in unincorporated Hillsborough County is the Brandon area with 1,371, followed by Carrollwood with 1,023. The City of Tampa's businesses are concentrated in the Westshore area, which contains 1,688 establishments, and downtown Tampa, which is home to 1,193 establishments.

The other five zip codes with more than 1,000 business establishments are not exclusive to a single political jurisdiction; these zip codes have areas in both the unincorporated County and Tampa. In these zip codes, we estimate that the City of Tampa contains 3,288 business establishments and the unincorporated County contains 3,545. However, the unincorporated County contains several other large zip codes with a substantial number of businesses. As a result, we estimate that the unincorporated County contains 2,640 more business establishments than the City of Tampa.

By NAICS industry group, Retail trade (NAICS 44) establishments are the most numerous kind of business in Hillsborough County representing 3,870 establishments or 14.6% of the total. This is closely followed by Professional, Scientific, and Technical Services (NAICS 54) with 3,581 establishments or 13.5% of the total. No other industry group exceeds 10% of total business establishments in the county.

Professional, Scientific, and Technical Services are the most numerous kind of establishment in the City of Tampa (1,540 or 16.9%) with 54% of these establishments located in just 4 zip codes:

33602, 33606, 33607, and 33609; these zip codes account for 36% of such establishments in Hillsborough County.

With the exception of the agriculture and mining (NAICS 11 & 21) industries, establishments across industry groups are largely located in zip codes either within or bordering the City of Tampa. Agricultural establishments are sparsely spread across the county's rural zip codes, while mining establishments are located in only four zip codes: 33503, 33570, 33592, and 33626.

Employment

Two zip codes in Hillsborough County contain over 50,000 employees: 33607 with 65,635; and 33619 with 56,117. Zip code 33607 is almost entirely in the City of Tampa (93.94%) and the majority of 33619 lies in unincorporated Hillsborough County (87.69%). Several other zip codes, which encompass parts of both unincorporated Hillsborough County and the City of Tampa, contain large numbers of employees. Although there are a large number of establishments distributed throughout much of the County, employment in the unincorporated portion of Hillsborough County is concentrated around the City of Tampa boundaries.

Total employment in the City of Tampa is estimated to be slightly greater than that in the unincorporated County. The employment distribution reflects high structural density buildings in the downtown area (zip code 33602) and the Westshore business district (33609 and 33607), which contain larger business establishments with more employees per firm.

Conclusions

We estimate that the unincorporated portion of Hillsborough County contains the majority of business establishments (53.3%) in the County. The City of Tampa contains approximately half of all employment in the county, with 49.3%. The unincorporated County's employment comes in a close second to Tampa with 47.5% of all County employment. Plant City and Temple Terrace contain less than 4% of business establishments and employment. Most business establishments across NAICS industry groups are located within or bordering the City of Tampa with Retail Trade and Professional, Scientific, and Technical Services comprising the largest number of establishments.

Appendix A. NAICS Definitions

The North American Industry Classification System (NAICS) groups establishments into industries that employ similar or identical production processes. NAICS codes consist of six digits and are structured in a hierarchical fashion. The first two digits designate NAICS *industry sectors* that represent general categories of economic activities. Subsequent digits represent *industry subsector, industry group, specific industry, and U.S., Canadian, or Mexican National specific codes*, respectively. The industry sectors represented by two digit NAICS codes are enumerated in the table below.

NAICS Code	Industry Sector
11	Agriculture, Forestry, Fishing, and Hunting
21	Mining
22	Utilities
23	Construction
31	Manufacturing
42	Wholesale trade
44	Retail trade
48	Transportation and warehousing
51	Information
52	Finance and Insurance
53	Real estate, Rental, and Leasing
54	Professional, Scientific, and Technical Services
55	Management of Companies and Enterprises
56	Administration, Support, Waste Mgt., and Remediation Services
61	Educational Services
62	Health Care and Social Assistance
71	Arts, Entertainment, and Recreation
72	Accommodation and Food Services
81	Other Services (except Public Administration)
95	Auxiliaries
99	Unclassified Establishments

Appendix B. Table B1

Table B1 contains detailed Zip Code Business Pattern data for all reported zip codes in Hillsborough County. Zip codes pertaining to specific political jurisdictions are located within the table on the following pages:

Zip Codes by Political Jurisdiction	Pages
Hillsborough County Exclusively	11 – 31
City of Tampa Exclusively	32 – 45
City of Temple Terrace Exclusively	46
Tampa/Temple Terrace/Hillsborough County Shared	47 – 52
Tampa/Hillsborough County Shared	53 – 79
Plant City/Hillsborough County Shared	80 – 87

Notes:

- ✖ Zip Code is in the ESRI US point database, but not in the Florida polygon database.
- ⬆ Data adjusted to exclude non-Hillsborough land area.
- ⌘ Number of establishments by NAIC may not equal total due to rounding error.
- ⓧ No data reported.
- A Data withheld to avoid disclosure, employment in 0-19 range.
- E Data withheld to avoid disclosure, employment in 250-499 range.

Sources: *ESRI ArcVIEW 1999 Data and Maps (for zip codes and boundaries) and 1999 Zip Code Business Patterns, US Bureau of the Census (for business establishments and employment).*

Appendix D. Maps

This section contains twenty-four thematic maps of Hillsborough County detailing current business and employment patterns, as well as, business distribution by NAICS industry group. The maps were created with data found in Table B1; however, not all zip codes in Table B1 are represented on the maps. (Refer to the section Zip Code Definitions.)
