Original papers

Donald A. McFarlane and Joyce Lundberg

New records of guano-associated minerals from caves in northwestern Borneo

Christoph Spötl

Moonmilk as a human and veterinary medicine: evidence of past artisan mining in caves of the Austrian Alps

Eleuterio Baeza, Rafael P. Lozano, and Carlos Rossi

Replication and reinsertion of stalagmites sampled for paleoclimatic purposes

Detlev K. Richter, Rolf D. Neuser, Martin Harder, Hardy Schabdach, and Denis Scholz

Unusual internal structure of cm-sized coldwater calcite: Weichselian spars in former pools of the Zinnbergschacht Cave (Franconian Alb/SE Germany)

Andrea Parimuchová, Vladimír Šustr, Miloslav Devetter, Ondřej Vošta, Ionuţ Popa, and Štubomír Kováč

The activity of saccharolytic enzymes in Collembola is associated with species affinity for caves

Micheline L. Campbell, John N. Callow, Gavan S. McGrath, and Hamish A. McGowan

Co-authorship analysis of the speleothem proxy-climate community: working together to tackle the big problems

Sulfur Cave (Romania), an extreme environment with microbial mats in a CO₂-H₂S/O₂ gas chemocline dominated by mycobacteria

Antimicrobial activities of culturable microorganisms (actinomycetes and fungi) isolated from Chaabe Cave, Algeria

Victor J. Polyak, Jessica B.T. Rasmussen, and Yemane Asmerom

Drip water measurements from Carlsbad Cavern: implications towards paleoclimate records yielded from evaporative-zone stalagmites
Adriana Espino del Castillo, Hugo Beraldi-Campesi, Patricia Amador-Lemus, Hiram I. Beltrán, and Sylvie Le Borgne

Bacterial diversity associated with mineral substrates and hot springs from caves and tunnels of the Naica Underground System (Chihuahua, Mexico) .................................................................213-227

Andrés Ulloa, Fernando Gázquez, Aurelio Sanz-Arranz, Jesús Medina, Fernando Rull, José María Calaforra, Guillermo E. Alvarado, María Martínez, Geoffroy Avard, J. Maarten de Moor, and Jo De Waele

Extremely high diversity of sulfate minerals in caves of the Irazú Volcano (Costa Rica) related to crater lake and fumarolic activity ..................................................................................................................229-246

Natália Raschmanová, Dana Miklisová, and Ľubomír Kováč

A unique small-scale microclimatic gradient in a temperate karst harbours exceptionally high diversity of soil Collembola..................................................................................................................247-262
