ANNOUNCEMENTS

Books

This book includes the full series of abstracts and extended abstracts presented at the Climate Change: the Karst Record Conference (4th edition) held in Băile Herculane, Romania in May 2006. The papers are grouped into topical sections, with papers arranged alphabetically inside sections. Many of the papers published in this book address or answer complex problems that regard the relationship between speleothem geochemistry, macroclimate, ecosystems, karst aquifers, and intimate crystal growth.

Events

ESIR Workshop (European Society for Isotope Research)
(9th edition)

June 23 – 28, 2007, Cluj Napoca, Romania

The Workshop will focus on facilitating contacts and fostering co-operation and networking among scientists from Central and Eastern European countries and their Western colleagues. The topics of the meeting will cover all major fields of application of isotopes. Talks by invited speakers, presenting the state-of-the-art in selected areas of isotope research are envisaged. Manufacturers of isotope equipment will be given opportunity to present their latest developments.

Workshop topics include application of stable and radioactive isotopes and isotopically labeled compounds in: geology, atmospheric studies, geochemistry, biochemistry, medicine, hydrology, ecology, environment studies, material science, paleoclimatology, and archaeology.
