Note to Contributors

1. Papers should be submitted online at http://scholarcommons.usf.edu/ijs through the "Submit Article" link. Texts should be typed 1.5 line spaced and have continuous numbered lines, preferably using Times New Roman 12 pt font, and should contain all figures, tables or plates. Tables, plates, and figures, with captions, should be placed after the reference list using the format of UIS (see most recent issues). For the review process, all figures and/or plates should be of low resolution to keep the final at a reasonable size.

2. Figures, plates, and tables should be sent at full resolution only after the review process is completed, and then in separate files (e.g. Fig1.jpg or Fig1.tiff, Tab1.doc or Tab1.xls). To do so, highlight “Supplemental Files” while submitting your revised manuscript, then upload your supplemental files and their short description for long tables. Microsoft Excel should preferably be used (e.g., MS Excel). Should a paper be taken to imply that it is unpublished and is not being considered for publication elsewhere.

3. Papers should preferably be written in English. Authors using a language other than their own are requested to have their manuscripts checked for linguistic correctness before submission. SI system units should be used. Dates should be in the form “5 February 1975”, numbers as 21.6 ºC (and not 12,6 ºC). Complex formulas and equations should be inserted in the text but after the review process is completed; these must also be sent separately as good-quality .jpg files.

4. Papers should be headed by a title, the full name(s), business address(es) and e-mail address(es) of the authors, plus full details of posts held by the author(s), if appropriate. If a paper has more than one author, the name of the person to whom correspondence and proofs should be sent must be followed by *.

5. Abstract should be short and summarise the contents of the paper. Authors should provide five keywords after the abstract. Keywords are separated by a ;. Articles can be structured in 3 orders of headings: e.g. GEOLOGY, Lithology, mineralogical characteristics. See recent issues for examples.

6. Each paper will be subject to editorial review by three referees. The Editorial Staff reserves the rights to refuse any manuscript submitted, whether by invitation or otherwise, and to make suggestions and modifications before publication. Submitted papers should be in a final form ready for publication. Make sure figures are of good quality. Correction to proofs should be restricted to printing and editorial errors only. Other than these, the cost of very substantial alterations may be charged to the author(s).

7. Bibliographical references should be listed in alphabetical and chronological order at the end of the paper. Journal names should not be abbreviated. See most recent issues for examples. References should be in the following forms:

7. References should be cited in the text in parentheses, e.g. "(Jones, 1961)" except when the author’s name is part of the sentence. e.g., "Jones (1963) has shown that..." Reference is made to a single work, e.g. "Jones (1963)" and when the author is the same name, e.g. "Jones & Jones (1963)." When reference is made to a number of works by a single author in the same year, e.g. "Jones (1963a, b, c)," then references should be cited in the text in parentheses in chronological order and separated by ; e.g., (White et al., 1988; Palmer, 2001).

8. After the review process is completed, each table should be supplied in separate files. Tables should be numbered using Arabic numerals, e.g. "Table 1," etc. Should a table not be on original, a full reference to its previous publication should not be given. Tables should be supplied with appropriate captions, and kept as simple as possible.

9. After the review process is completed, color figures should be supplied in separate files. Figures should be numbered using Arabic numerals, e.g. "Figure 1," etc. and must be cited in the text close to where they are intended to be placed. Graphs and diagrams should be suitable for a reduction to the journal format. Figures and photographs should be supplied with appropriate captions, and kept as simple as possible. Please use same font size when generating your figures or plates.

10. Letters to the Editorial Staff should relate to single topics, provide comment on editorial policy or discuss the content of the International Journal of Speleology, or be responses to comments published in earlier issues of the journal.

11. Articles accepted by the Editorial Staff will become the property of the Publisher and may not be reprinted or translated without the written permission of the Publisher.

12. The Editor and the Publisher of the International Journal of Speleology are not responsible for the scientific content or other statements provided by the authors of accepted papers.
